## About Me

I am an IT graduate from the University of Cabuyao with a deep passion for crafting seamless digital experiences. From UI/UX prototyping to full-stack web and mobile development, I love bridging the gap between abstract concepts and interactive, real-world applications. Having designed and deployed functional platforms for both academic and government environments, I bring a collaborative spirit and a strict user-first mindset to every project. I am a lifelong learner, always eager to dive into new technologies and build systems that truly make a difference

## Education

UNIVERSITY OF CABUYAO(PAMANTASAN NG CABUYAO) 2022 - 2026  
Bachelor of Information Technology

## Technical Skills

- **Frontend Development:** HTML5, CSS3, JavaScript, TypeScript, Vue.js 3
- **Backend & Databases:** PHP, MySQL, Python (FastAPI)
- **Mobile Development:** Flutter / Dart (Intermediate)
- **UI/UX Design:** Figma
- **Tools & Platforms:** Git/GitHub, Visual Studio Code, Firebase, MS Excel (Data Aggregation)

## Internship/OJT Experience

CITY SCHOOLS DIVISION OFFICE OF CABUYAO (DEPED) - SGOD DEPARTMENT

Web Developer Intern | 2026

- Led full-stack development of the "SGOD: School Permit Registry System" for managing academic permits.
- Developed automated document scanning (OCR) logic for data extraction with manual encoding backups to ensure complete data coverage.
- Created the system's UI/UX in Figma, enhancing navigation with dynamic routing and real-time notifications.
- Built backend utilities for data export, enabling administrators to generate Excel summaries of permits.
- Provided IT support, including hardware setup and Excel database management for staff.

## Project

**Documents and Assets Management System for Sta. Elena Properties Inc. (Capstone Project)**

- Collaborated with a team to design a digital tracking system for real estate.
- Handled technical writing, formatting, and data architecture for the system manuscript.
- Managed the documentation lifecycle, detailing system analysis and specifications.

**CCS Comprehensive Profiling System**

- Led frontend architecture for the admin module and co-developed faculty and student portals.
- Designed user interfaces and functional flowcharts using Figma prior to development.
